About US

Interra is a global leading provider of next generation information & communications technology (ICT) solutions for both the private and public sectors. We specialize in providing technology-enabled business solutions and consulting services that will serve as a driving force for our clients' business growth and improvements in operational efficiency.

Our business solutions and platforms are built out of a complete understanding of the challenges faced by our clients and we aim to ensure they are value-adding and sustainable.

OUR MISSION VISION MANTRA

Our Mission

To deliver technology-enabled solutions that improve the lives of our customers and their businesses.

Our Vision

To be the pre-eminent provider of value-adding technology solutions to the world's emerging markets.

Our Mantra

We don't sell hardware or software, we provide solutions.

OUR SERVICE OFFERING

OUR BROAD RANGE OF SERVICE OFFERINGS SPECIALLY DESIGNED TO SUIT OUR CLIENTS' UNIQUE REQUIREMENTS.

Business Process Outsourcing/Management:

With today's competitive and global marketplace, companies and organizations are best suited at focusing on core competencies.

Our Business Process Outsourcing services provide the world-class processes, technology and best practices you need to propel your organization forward. Utilizing expertise gained through decades of experience, Interra adds value to its BPO offerings by providing business intelligence, analytic and consulting services that allow our clients gain deeper insight into their business processes and address key business challenges.

Our available services include:

- Contact Center Solutions
- Helpdesk Support
- Telemarketing & Customer Campaigns
- Data Entry & Processing
- Document Management Systems
- Consulting and Professional Services
- Capacity Building

Network Infrastructure:

We provide end-to-end infrastructure services including computing and communication solutions.

We fully understand and deliver services essential to the planning, installation, configuration & management of data transmission networks of all scales, and facilitating the efficient exchange of information among computer networks using the latest data transmission technologies.

Our service offerings include:

- Network Design & Consulting
- Structured Connectivity
- High Speed Routing & Switching
- Data Center
- Clean Power Solution
- Environmental Monitoring Solution

Software/Enterprise Application Solution:

Software development is a fundamental forte of Interra Networks. We offer custom Application Development, particularly based on the core business requirements of our clients. With a perfect blend of creativity and modern technologies, we develop applications that are geared towards helping our clients achieve their business objectives.

Our competencies lie in the following:

- Portals
- Information Systems
- Enterprise Application Development
- Mobile & Web Application Development

Security Solutions:

We provide comprehensive Security Solutions to clients' facilities knowing how important security is to their business operations.

Our approach is to provide security solutions at multiple levels depending on our clients' requirements and needs. We offer comprehensive threat management solutions that defend your investments: be it physical security, information security or security consulting, we have the capacity to help you address your security concerns.

Our competences include the following:

- **Information and Network Security**
Enterprise Firewall, End Point Security, Network Audit, Application Security, Network Security Optimization and Business Continuity Design.
- **Surveillance and Monitoring**
Network Camera Solution, Video Analytics Solution, Command & Control Center and Intrusion Monitoring & Response.
- **Identity Management**
Asset/Inventory Management, Access Control, Time & Attendance System.

Support & Maintenance:

We provide technology and consulting services built on a strong technical competence and knowledge of the challenges faced by our clients across all sectors of the economy.

Our post-deployment activities/robust support strategy helps ensure long term sustainability of clients' project, thus the birth of our support and maintenance solution.

Our clients are supported with industry qualified and inspired professionals to offer regular maintenance and support checks that would prolong equipment life span, improve efficiency, erase downtime and reduce emergency repairs.

Our support services are also available across multiple access channels: phone, email and chat.

Our service provides end to end support and maintenance in the key functional areas of:

- Desktop Support
- Network Support
- Application Support
- Back-up and Recovery
- Service Desk
- Power and Cooling

OUR MARKET

Interra Networks' services span over a wide array of areas, with a vision to strengthen diverse sectors in the delivery of their mandates. With our technological solutions we create efficiency and ease for our clients thereby improving the effectiveness of their processes as well as boosting their clientele base. With 12 years of experience, we have built sector specific solutions with focus on the industry's unique requirements.

Our solutions cut across the following verticals:

OPENING DOORS TO NEW TECHNOLOGICAL INNOVATIONS

INTERRA ADVANTAGE

We “partner” with our clients and go beyond our focus on technology; focusing more on process alignment and “developing people” that will ensure success and sustainability. This is what sets us apart from everyone else and the reason we have a flawless track record with our clients.

Deep Industry Knowledge:

Our years of experience and service delivery has made us a key player in the Information Technology industry.

Our People:

At Interra, our team makes the difference! Highly motivated and service oriented individuals skilled in providing world class service to our clients while exuding professionalism.

Our Facility:

Headquartered in the USA with branch offices in the Central Business District of Abuja and the serenity of Enugu, we have 24/7 power, dedicated & reliable internet capacity, E1 connectivity with failover capabilities and top of the art security.

Superior Support and Maintenance Culture:

We have a well-experienced team that supports all our deployments using a centralized approach to ensure sustainability and guarantee business continuity.

Excellent Partnership:

We are accredited partners to renowned technology providers..

Right Technology:

We utilize our in depth knowledge in technology, to make the right choice of technology that will increase our client's daily operational efficiency and return on investment.
